

# 4526

2900 CHU  
92-96 Days  
(2750 - 2925 Silage CHU)

## Consistent Yield Performer for Both Grain & Silage

### Hybrid Features

- Very consistent performer for grain and silage producers
- Conventional hybrid with high yields and strong stalks
- Excellent spring vigour
- Early flowering and fast drydown
- Long, girthy ear with good test weight grain
- Tall plant with solid harvest standability
- Excellent choice for silage with high TDN and energy yields per acre

### Positioning/Management

4526 is a leader hybrid with consistent performance as both a grain and silage hybrid. Performs in a maturity range from 2850-2950 CHU.

Recommended final population is 27-30,000 but the ear will flex at lower populations. 4526 has exhibited a good natural tolerance to European corn borer. Adapts to all soil types and management practices. Use as a refuge for A6686Bt.

Check with Pride Seeds for a list of key competitors to position against.

### Detailed Hybrid Information

**Mid Flowering:** 1225 GDU      **Black Layer:** 2260 GDU  
**Plant Height:** Tall              **Leaf:** Semi-Upright, Wide  
**Ear Height:** Medium-Low      **Ear Type:** Flex  
**Cob Colour:** Red                  **Kernel Rows:** 18  
**Disease Tolerance:** Very good plant health  
**Corn Borer Tolerance:** Very good European corn borer tolerance  
**Harvest Population (000s per acre):** 27-30
