

K108

2400 CHU
74-76 Days

Starts Strong and Finishes Fast

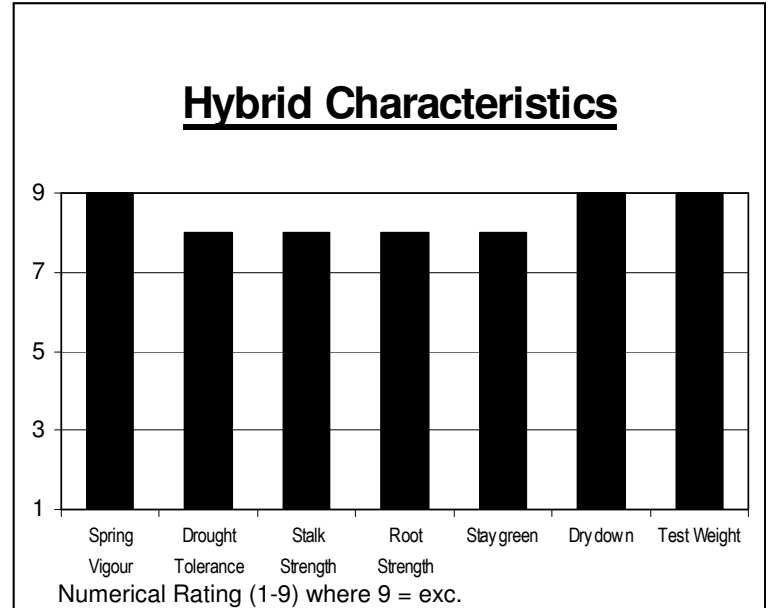

Hybrid Features

- Excellent grain quality with top end conventional yields
- Dent/flint genetics
- Good late season plant health
- Above average test weight
- Good response to high fertility
- Recommended for grain and high moisture corn
- HeroPack combination with A4641Bt

Positioning/Management

K108 shows excellent top end yield potential for a conventional hybrid with above average test weight and grain quality on a white cob. The dent portion of this genetic package is responsible for rapid drydown while the flint side maintains its impressive test weight. K108 exhibits season long plant health on all soil types. It is an excellent refuge for A4641Bt. Excellent choice for no-till growers. Use of Ultim[®] herbicide is not recommended on this hybrid because of its early maturity.

Check with Pride Seeds for a list of key competitors to position against.

Detailed Hybrid Information

Mid Flowering: 1019 GDU **Black Layer:** 1915 GDU
Plant Height: Medium **Leaf:** Upright
Ear Height: Medium-Low **Ear Type:** Fixed
Cob Colour: White **Kernel Rows:** 14
Disease Tolerance: Very good plant health
Corn Borer Tolerance: Good tolerance to European corn borer
Harvest Population (000s per acre): 28-31
