

K542

3250 CHU
104-106 Days
(3000-3250
Silage CHU)
Hero Hybrids

The Winner – High Yielding Conventional Hybrid with Plant Health and Fast Drydown

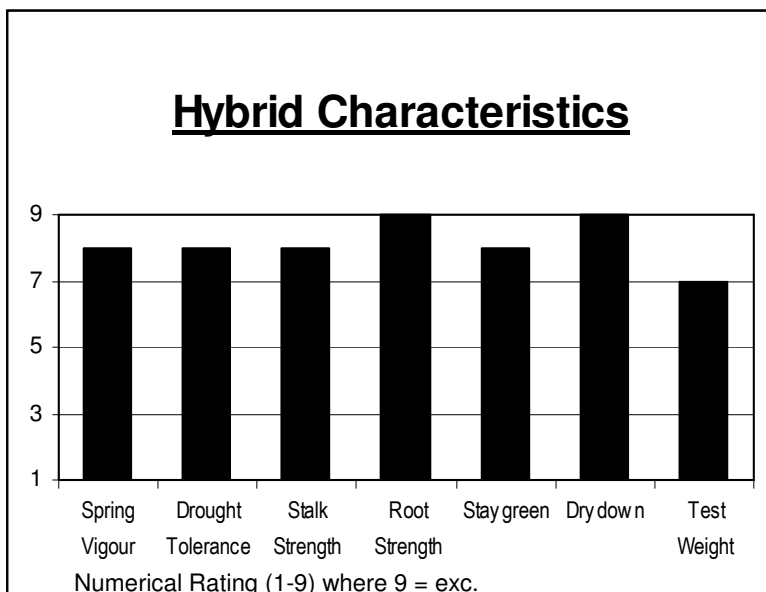

Hybrid Features

- Top yielding conventional hybrid for maturity
- Maintains strong plant health throughout the season
- Excellent stalk and fall intactness
- Very fast drydown producing high quality grain
- Excellent choice for premium grain markets

Positioning/Management

A top yielding conventional hybrid in grower fields and Ontario Corn Committee Trials. K542 has an excellent genetic package that gives consistent performance over a wide range of environments and soil types. Flex ear lets this hybrid adapt to lower populations under lighter soil conditions. Excellent alone or as a refuge hybrid for K563Bt or A8107Bt.

Check with Pride Seeds for a list of key competitors to position against.

Detailed Hybrid Information

Mid Flowering: 1293 GDU **Black Layer:** 2530 GDU
Plant Height: Medium **Leaf:** Semi-Upright
Ear Height: Medium **Ear Type:** Highly Flexible
Cob Colour: Light Red **Kernel Rows:** 18
Disease Tolerance: Very good plant health
Corn Borer Tolerance: Very good European corn borer tolerance
Harvest Population (000s per acre): 27-30
Best Refuge Option: Not applicable
