

A5892G3 EDF

2850 S-CHU
90-94 Days
(2700-2950
Silage CHU)

High Yielding Hybrid

Hybrid Features

- Effective digestible fibre (EDF) hybrid with excellent silage characteristics and high tonnage per acre
- Roundup Ready[®] *crop safety yield advantage*
- Rootworm protection for corn on corn rotations
- Bt Corn borer protection

Positioning/Management

Effective digestible fibre (EDF) hybrid offers the advantage of high digestibility and palatability for improved feeding efficiency. **For silage use only - not to be used for grain production.**

Check with PRIDE Seeds for a list of key competitors to position against.

Hybrid Management Guidelines

Medium-Late Flowering for Maturity

Plant Height: Tall Plus

Ear Height: Medium-High

Ear Type: Semi-Flex

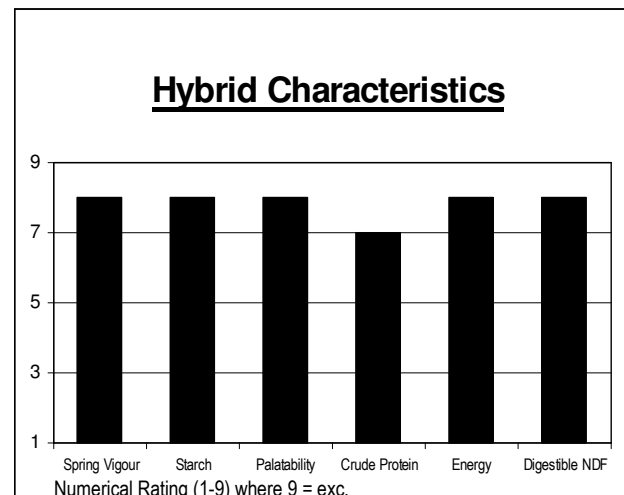

Leaf Angle: Semi-Upright

Cob Colour: Pink

Kernel Rows: 16

Disease Tolerance: Very Good

Harvest Population (000s per acre): 27-29
