

PRIDE SEEDS

SILAGE CORN

AS1017RR EDF

2050-2250 CHU

Product Features

- Early silage, high moisture corn offering opportunity in shorter season growing areas
- Features slow grain drying rate preserves reliable and consistent feed quality at ideal moisture content
- Strong emergence and aggressive spring vigour
- Tall uniform plant height
- Produces consistent ear size producing flint kernels on white cob

Agronomic Characteristics

EDF or EDP	EDF
Flowering	L
Mid Flowering GDU	1125
Plant Height	V/T
Emergence	VG
Spring Vigour	VG
Stalk Strength	EXC
Root Strength	EXC
Staygreen	EXC
Drought Tolerance	VG
Plant Health	EXC
Ear Type	F
Starch	VG
Crude Protein	VG
NDFD	VG
Milk or Beef Acre	VG
Milk or Beef Tonne	VG
Goss's Wilt	F

Ratings EXC = Excellent VG = Very Good G = Good F = Fair

Plant Height S = Short M = Medium T = Tall V/T = Very Tall

Flowering E = Early E/A = Early Average A = Average L = Late

Ear Type F = Fixed SF = Semi-Flex FL = Flex

All orders and sales are subject to the PRIDE Seeds Terms and Conditions of Sale, which include but are not limited to the Limitation of Warranty & Remedy and Agronomic Zone and Planting Year. All Terms and Conditions of Sale are subject to change from time to time without prior notice. PRIDE® & Design, P® & Design, Advantage Acre®, and Pride Advantage Acre® & Design are registered trademarks of AgReliant Genetics Inc. Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products.
