

GRAIN CORN

A7286 G7 E-Z Refuge®

3075 CHU

Product Features

- DuracadeViptera® hybrid for value added above and below-ground insect trait protection including built-in protection from western bean cutworm and corn rootworm
- A medium/tall statured plant featuring consistent and very girthy blocky ear size
- Competitive yield capability over variable soil types
- Excellent late-season health and plant intactness allows for late harvest

Management Tips

Very good spring vigour allows for early planting. Very good disease package and sound agronomic characteristics. Very good drydown allows for flexible harvest. Keep populations to 30,000-32,000 pl/acre. Position if corn rootworm, western bean cutworm or corn earworm is a concern. Avoid planting it at high plant densities and in waterlogged heavy clay soils
