Farming can be a demanding occupation, subject to a variety of factors such as time, weather, and global pressures. You need an advantage to help successfully navigate these factors and maximize performance.

You need PRIDE® Seeds, a trusted partner dedicated to consistently delivering successful outcomes with our unique portfolio of seed and service. This dedication is fueled by AgReliant Genetics®, our parent company focused solely on seed and delivering one-of-a-kind germplasm never-seen-in-North America.

But as a parent, AgReliant doesn’t stop there. They’ve significantly invested in research and development focused on the discovery of new, diverse genetic innovation to provide unique, high performing solutions for your specific pest, disease, and weather challenges for today and for the future.

Our breeders walk local fields, conducting first-hand field observations and hands-on interaction with local field agronomists to ensure our genetics meet the goals of each farmer. We log more than 50,000 in-season hours of agronomic review of a full 800,000 test plots, with up to 50 measured traits per hybrid.

When it comes to performance, yield matters. After all, greater yield means more money in your pocket. PRIDE Seeds consistently provides leading-edge seed options that delivers yield where it matters most, on your farm.

Trust in PRIDE Seeds, from the AgReliant Genetics® family.

Farmers deserve an advantage: The PRIDE® Seed Advantage. You have access to leading-edge products through PRIDE Seeds that enable success where it matters most - on your farm. You can rely on our dedicated team to provide sales expertise, agronomy support, quality production, and service tailored to meet your needs.

- **Best-in-class genetics** together with industry-leading traits and seed treatment protection.
- **Dedicated sales and customer service teams** who provides expertise and service tailored to meet your needs.
- **Personal agronomy guidance and products** designed to help you take full advantage of your seed’s genetic potential.
- **Access to comprehensive information** through tools such as annual plot data across Canada and the United States.
- **Superior seed quality** driven by our dedicated production teams.
- **An industry-leading Stand Protection Policy** in the event of replant or severe stand reduction situations based on seed treatment type used.
- **Timely field support** to answer your questions, particularly during stand establishment in the spring.
- **Payment options and programs** which include:
  - Early cash discounts
  - Flexible payment options including Visa and MasterCard
  - Partner Plan extended credit programs to help manage cash flow

FOCUSED ON PERFORMANCE 7
PRIDE SEEDS
G SERIES
Growers and dealers have access to the best-in-class corn hybrid options thanks to the G SERIES from PRIDE Seeds.

This gives you access to unique genetic pairings that may be matched with trait options to meet your farm needs and operation goals.

The G SERIES is derived from programs designed to deliver competitive and valuable products for growers across Canada. You can rely on a complete portfolio of seed and service that will maximize performance and yield. See below for details:

BUILT-IN CORN ROOTWORM PROTECTION
UNLIKE

DEFEND LIKE A PRO

3X GREATER ROOT NODE PROTECTION FROM HIGH-PRESSURE CORN ROOTWORM VS. QROME® PRODUCTS IN HIGH-PRESSURE CORN ROOTWORM ENVIRONMENTS.

AN INNOVATIVE RNAi-BASED MODE OF ACTION

3X GREATER ROOT NODE PROTECTION ABOVE-AND BELOW-GROUND PEST PROTECTION

ASK YOUR SEED REPRESENTATIVE ABOUT THE STRONGEST BIOTECH DEFENCE AGAINST CORN ROOTWORM.

*3x2021 Bayer Trials in the corn belt (IL, IA, NE, SD, ND, WI, OH, MN) in medium to very high corn pressure environments (as shown by a Node Injury Score of 0.76 to 3 on a 0-3 scale in the non-CRW traited check vs SmartStax® RIB Complete® Corn Blend, Agrisure Duracade®, E-Z Refuge®, Roundup®, and Optimum®

AcroMax®) in corn products in the 85-115 RM range with comparable trait packages.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer’s Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported, used, processed or sold in countries where regulatory approval has been granted. It is a violation of national and international law to move material containing biotech traits across international borders or to use such material in a manner not approved for its use. Bayer’s products are not substantially equivalent to any presently approved herbicide-resistant technology. Always read and follow label directions. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. RIB Complete®, Roundup Ready® Technology and Design®, Roundup Ready® and SmartStax® are trademarks of Bayer Group. Used under license. All rights reserved.
The best way to minimize the risk of devastating crop damage is to help maximize control of high-pressure corn rootworm* below ground while protecting against above-ground pests. SmartStax® PRO with RNAi Technology will provide three modes of action against corn rootworm.

**WHAT SETS SMARTSTAX® PRO TECHNOLOGY APART**

- Will be the first product with **THREE** modes of action for corn rootworm control
- Will combine the proven benefits of SmartStax® Technology with an additional, RNAi-based mode of action
- SmartStax® PRO Technology will provide broad-spectrum control of **above- and below-ground pests as well as tolerance to glyphosate and glufosinate herbicides**

**QUANTIFYING THE DAMAGE**

Root damage is primarily caused by corn rootworm larval feeding. Every root node nibbled by larvae can result in a yield loss of approximately 15%. In addition, root lodging can impede harvesting, further reducing grain yield by 15%–34%.

**EXCEPTIONAL ABOVE- AND BELOW-GROUND PROTECTION**

Multiple modes of action give corn plants the protection they need against major pests that can inflict serious crop damage.

*34-2021 Bayer Trials in the corn belt (IL, IN, NE, IA, MO, SD, WI, MN) in medium to very high CRW pressure environments (as shown by a Node Injury Score of 2.76-3.0 on a 0-3 scale in the non-CRW treated check) vs SmartStax® PRO Complete Corn Blend, Agrisure Duracade® E-Z Refuge®, Steward® and Optimax® AcreMax™ Stroma products in the 95-115 RM range with comparable trait packages

Built-in modes of action, SmartStax® RIB Complete® corn can deliver maximum control of corn rootworm, the billion dollar bug. Plus, it’s a RIB Complete® brand corn blend, which means refuge compliance for the corn-growing area is easier than ever.

**ABOVE GROUND AND BELOW-GROUND INSECT PROTECTION, PLUS THE CONVENIENCE YOU WANT.**

SmartStax® RIB Complete® corn blend is one of the most advanced insect and weed control systems available. SmartStax® technology provides two proven, highly effective modes of action against below-ground corn rootworm and additional modes of action against above-ground insects, including corn earworms. This broad-spectrum insect protection and weed control blend offers farmers high yield potential.

**FEATURES & BENEFITS**

- Multiple modes of action to help protect plants above and below the ground.
- Multiple modes of action against corn earworm*, corn rootworm, and European corn borer.
- Protects roots to enable the best nutrient and water uptake.
- Protects shoots to enhance photosynthesis and grain production.
- The use of unique multiple modes of action provides enhanced insect protection – while maintaining long-term durability of the trait technology.
- Solution for corn on corn growers.
- Tolerant to Liberty® herbicide.

* Cry0A.105 and Cry2Ab2 from B.t. controls or suppresses corn earworm. Your results may vary depending on agronomic, environmental and pest pressure variables.
Trecepta® corn targets corn earworm with three modes of built-in action to reduce yield loss by protecting kernels from a wide range of pests. Built on the proven VT Double PRO® technology, Trecepta® technology gives you more complete control over above-ground insects.

GET CLEANER EARS WITH BROAD-SPECTRUM PROTECTION AGAINST ABOVE-GROUND PESTS.

Trecepta® technology combines the power of three different modes of action for broad-spectrum control of above-ground feeding pests, including Western bean cutworm*. This technology helps to put more grain in the bin and more money in the bank.

Three unique modes of action for maximum protection from damage caused by above-ground feeding pests, including European corn borer, corn earworm, fall armyworm, black cutworm and Western bean cutworm.

FEATURES & BENEFITS

• Built on the proven performance of VT Double PRO® technology.
• Promotes healthy stalks and cleaner ears to help improve grain quality.
• Delivers maximum protection from above-ground insect damage through multiple modes of action.
• Includes Roundup Ready® 2 technology for effective weed control and excellent crop safety.

*Where Western bean cutworms were present, tested corn hybrids containing the Trecepta® trait had higher yields and quality than tested corn hybrids not containing the Trecepta® trait. Source: 11 Market Development Trials (2017-2018). Your results may vary based on agronomic, environmental and pest pressure variables.
Above-ground insects like European corn borer, Southwestern corn borer, fall armyworm, and corn earworm have the potential to cause considerable damage to your crops. VT Double PRO® corn offers two modes of action against these pests.

DUAL MODES OF ACTION TO CONTROL ABOVE-GROUND PESTS WITH THE CONVENIENCE OF REFUGE IN THE BAG.

VT Double PRO® RIB Complete® provides dual modes of action for above-ground insects with the convenience and simplicity of refuge in the bag. Plus, the reduced refuge of just 5% of planted acres allows for higher whole-farm yield potential.

FEATURES & BENEFITS

- Advanced above-ground protection with dual modes of action to control corn earworm*, European corn borer and fall armyworm.
- Roundup Ready® 2 Technology for broad-spectrum weed control.
- This product provides in-seed tolerance to Roundup agricultural herbicides.
- Automatic refuge compliance – blend of 95% insect protected and 5% refuge seed in every bag.
- With a 95/5% blend of insect-protected seed and refuge seed, you can plant the most traited acres across your entire farm.

* Cry9A.105 and Cry2Ab2 from B.t. controls or suppresses corn earworm.
PRIDE Seeds AS1047RR EDF silage is the heavy weight champion for your farm!
Over the past 5 growing seasons and in 141 comparisons to our competitor’s industry leading products, AS1047RR EDF provided on average 0.6T/AC more feed, with 1805 more milk/acre. While providing optimal value in feed quality.

Power. Performance. Results! Talk to your local PRIDE Seeds dealer today.
PRIDE Seeds is proud to offer our growers the best-in-class seed treatments on the market.

For grain and silage corn, PRIDE Seeds has partnered with...

Vayantis® corn seed treatment offers the broadest spectrum of Pythium control on the market. It also delivers a unique mode of action with no known cross-resistance, so growers can be sure their crop is protected.

**FEATURES & BENEFITS**

- Broadest spectrum of Pythium control on the market.
- Delivers a mode of action with no known cross-resistance plus built-in resistance management.

---

**Performance evaluations are based on internal trials, field observations and/or public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil, and weather conditions. Always read and follow label directions. Trademarks are property of their respective owners.**

Base: Fortenza Maxim Quattro Stamina. Vayantis treatment had same base treatment as check.

---

PRIDE SEEDS DOES NOT OFFER UNTREATED SEED CORN
Fortenza® is a non-neonicotinoid corn seed treatment that controls cutworm, European chafer and wireworm, and suppresses seed corn maggot. Fortenza helps build a strong corn stand, even under heavy insect pressure, producing faster, more uniform growth.

Stamina® fungicide seed treatment works by providing greater seedling vigour for increased growth both above and below ground. The results are more consistent and uniform emergence with a greater ability to manage exposure to minor environmental stress, including under cold conditions. In addition, the Group 11 active ingredient works to provide effective protection against seed rot caused by Rhizoctonia solani.

Characteristics are assigned by PRIDE® Seeds based on comparisons with other PRIDE® Seeds products (not competitive products) through in-house field testing. Individual results may vary. Performance may vary from location to location and from year to year, as local growing, soil and weather condition may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower’s fields.

**A3979G2 RIB**  
2025 CHU

- Very strong early grain hybrid for short season maturity zones.
- Excellent emergence and seedling vigour for a fast early season start.
- Very nice ear girth and consistency.
- Combines top-end high yield potential and stability across soil types.
- Flowers appropriate for heat unit rating with rapid drydown for maturity.
- Has shown very stable, high yield potential for maturity rating.

**A3993G2 RIB**  
2050 CHU

- Very early grain and grazing hybrid for short season maturity zones.
- Rapid emergence and superb seedling vigour for a fast early season start.
- Very nice grain quality and ear consistency.
- Brings consistent yield potential to this very early maturity zone highlighting it’s outstanding late season standability and staygreen.

**A4414RR**  
2150 CHU

- Proven multi-purpose grain, silage and grazing hybrid.
- Very strong stalks and root strength.
- Visually attractive with fixed ear type.
- Keep progressive populations to maximize yield.
A4323G2 RIB
2200 CHU

- Ideal as grain hybrid with very rapid drydown.
- A medium/tall statured plant featuring consistent ear size and plant stature.
- Good ear girth and length with excellent consistency in different environments.

A4494G2 RIB
2250 CHU

- NEW VT Double PRO® hybrid for 2250 heat unit zones.
- Provides trait protection for above ground insects.
- Combines top-end high yield potential and stability across soil types.
- Medium length/girthy stout ears producing quality clean grain.
- Versatile, with a strong agronomic package.
- Stands tough and yields big.

A4646G2 RIB
2300 CHU

- High performance dual-purpose grain and silage hybrid.
- Excellent yield potential with good drydown.
- An attractive corn that has impressive stay-green and plant health.
- Well-balanced plant with nice stature.
**NEW VT Double PRO® hybrid for 2375 heat unit zones.**
- Provides trait protection for above ground insects.
- Medium length/girthy ears producing quality clean grain.
- Shows stable yield in its adapted maturity zone.
- Desirable yield to moisture ratios.

**A4848G2 RIB 2375 CHU**

**A4939G2 RIB 2400 CHU**
- Proven track record over multiple years.
- Strong yield potential across environments and populations.
- Great choice as dual-purpose grain and silage hybrid usage.
- Consistent, girthy ear style.
- Maintains plant integrity and attractive appearance through late season.

**A5105 2400 CHU**
- Conventional hybrid for 2500 CHU maturity range.
- A medium-statured plant featuring consistent ear size and plant stature.
- Will respond to higher populations.
- Very strong late season intactness.
A5222
2575 CHU

> Conventional version of A5225 G2 RIB with consistent yield and excellent drydown.
> A medium-statured plant featuring strong agronomics.
> This grain hybrid has open flared husks for enhanced drydown.
> Best performance with aggressive populations.

A5225G2
2575 CHU

> Proven focus hybrid with outstanding performance over many years.
> A medium-statured plant featuring consistent yield potential and strong agronomics.
> This grain hybrid has open flared husks for enhanced drydown.

A5292G8 RIB
2600 CHU

> New SmartStax® hybrid for 2600 heat unit zones.
> Provides trait protection for above and below ground insects.
> Strong emergence and rapid seedling vigour.
> Impressive disease tolerance ratings
> Excellent opportunity for positioning for corn rootworm trait protection.
> Ideal usage as grain hybrid but also be used as a silage choice.
**NEW VT Double PRO® hybrid for 2625 heat unit zones.**

- Provides trait protection for above ground insects.
- Top end yield potential, reliable agronomics, and strong disease tolerance combine for a robust agronomic package.
- Take-anywhere hybrid with exciting yields.
- Strong agronomic package provides placement versatility.

### A5404G2 RIB 2625 CHU

- Short plant height with sturdy stalks.
- Stout and girthy ear.
- Stout, blocky ear size and girth.
- Has shown very stable performance with top-end yield potential.
- Early flowering allows for rapid grain setup.

<table>

**A5432G2 RIB**
2650 CHU

- Proven performance with strong yield potential.
- Flexible as a dual-purpose usage hybrid.
- Early flowering with very strong late season intactness and stalk strength for a taller plant.
- Great drought and stress tolerance.

**A5383G8 RIB**
2675 CHU

- Features above and below-ground insect trait protection.
- Workhorse type hybrid with good defensive agronomics.
- Versatile hybrid adapted to all production systems.
- Fixed ear type, full dent grain with good girth and flared husk.
- Exhibits unique reddish grain.

SILAGE CORN HYBRIDS
The PRIDE Total Ration Solutions (TRS) System goes beyond field appearance to ensure our hybrids deliver what matters most at harvest: yield, energy, digestibility, palatability and overall nutritional value.

Using testing and information programs, the PRIDE TRS System identifies hybrids which maximize silage yield potential and quality. Hybrids are further segmented into two groups:

**EFFECTIVE DIGESTIBLE FIBRE (EDF)**
Hybrids are silage-specific and offer the advantage of high digestibility and palatability for improved feeding efficiency.

**EFFECTIVE DUAL PURPOSE (EDP)**
Hybrids offer consistent high energy and silage quality PLUS the flexibility to use as a grain hybrid depending on your operational needs.

**THE PRIDE TRS SYSTEM** identifies our best forage products. Alfalfa together with EDF and EDP silage hybrids, varieties, and forage mixtures, are designed to meet the energy, digestibility, and protein needs of dairy and beef operations.

**Effective Digestible Fibre (EDF) hybrids** are silage-specific and offer the advantage of high digestibility and palatability for improved feeding efficiency.

**Effective Dual Purpose (EDP) hybrids** offer consistent high energy and silage quality PLUS the flexibility to use as a grain hybrid depending on your operational needs.

Characteristics are assigned by PRIDE<sup>®</sup> Seeds based on comparisons with other PRIDE<sup>®</sup> Seeds products (not competitive products) through in-house field testing. Individual results may vary. Performance may vary from location to location and from year to year, as local growing, soil and weather condition may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower’s fields.

> Ideal choice for short season silage production.
> Superb forage yields from an early silage, high-moisture corn, offering opportunity in shorter season growing areas.
> Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content.
> Strong emergence and aggressive spring vigour.
> A solid fit for beef feedlot operations.
> Tall, uniform plant height.
> Produces consistent ear size with flint kernels on white cob.

> NEW silage specific hybrid with above ground insect trait protection.
> Ideal choice for short season silage production.
> Superb forage yields from an early silage, high-moisture corn, offering opportunity in shorter season growing areas.
> Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content.
> Strong emergence and aggressive spring vigour.
> A solid fit for beef feedlot operations.
> Tall, uniform plant height.
> Produces consistent ear size with flint kernels on white cob.

> Features dual-purpose grain and silage characteristics.
> Combines early maturity with very good digestibility for high energy yield.
> Stable performer on challenging sites where early harvesting is a necessity.
> Outstanding emergence, standability and health.
> Long-lasting stay-green.
> Early grain maturity, ensuring a high starch content and an early harvest.
> Maximum starch yield candidate.
A4477HM
2100-2250

> Conventional silage, high-moisture and grazing corn, offering higher grain density and disease tolerance.
> Features slow grain-drying rate and preserves reliable and consistent feed quality at ideal moisture content.
> Aggressive spring vigour for early maturity zone.
> High starch levels provide excellent quality silage.
> Excellent for grazing use with high yield, nutrition and strong stalks.
> Produces very girthy, exceptionally consistent ears, producing flint kernels on white cob.
> A solid fit for beef or dairy operations.

A4705HMRR
2200-2350

> Benchmark product for the silage, grazing and high-moisture corn grower.
> Ideal for securing an early harvest regardless of planting date.
> Slow grain drying rate preserves reliable and consistent feed quality at ideal moisture content for a wide harvest window.
> Positive digestibility-to-starch ratio and exceptionally long lasting staygreen.
> Consistently high quality energy content and intake potential.
> Strong emergence and aggressive spring vigour for early maturity zone.
> Excellent for grazing use with high yield, nutrition and strong stalks.
> A solid fit for beef or dairy operations.

A4646G2 RIB
2175-2275 CHU

> Dual-purpose silage and grain hybrid with the benefit of above ground insect trait protection.
> Combines very good digestibility and high starch content for high energy yield.
> Strong emergence, standability and plant health.
> Early grain maturity, ensuring a high starch content and an early harvest.
A4939G2 RIB
2225-2375 CHU

> A proven dual-purpose silage or grain hybrid choice for varying soil types.
> Ideal balance of forage yield and energy content.
> Maximum starch yield with rock solid performance.
> Consistent top-end tonnage punch with flex ears.
> An excellent dual-purpose grain or silage hybrid choice for varying soil types.
> Outstanding health and agronomics.
> Very good option for high nutritional value with maximum starch yield.

AS1027RR EDF
2250-2425 CHU

> Strong choice for high moisture corn or silage feed.
> Rewards growers with high yields for an early harvest.
> Very tall plant with consistent ears that produce flint kernels on white cob.
> Excellent silage characteristics, yield and energy content.
> Slow grain and plant drying rate preserves reliable and consistent feed quality at ideal moisture content.
> Excellent choice for beef feedlot producers.
> Additional stay-green nature for a wider harvest window.

NEW
silage specific hybrid with above ground insect trait protection.

AS1028G2 EDF RIB
2250-2425 CHU

> NEW silage specific hybrid with above ground insect trait protection.
> Strong choice for high moisture corn or silage feed.
> Rewards growers with high yields for an early harvest.
> Very tall plant with consistent ears that produce flint kernels on white cob.
> Excellent silage characteristics, yield and energy content.
> Slow grain and plant drying rate preserves reliable and consistent feed quality at ideal moisture content.
> Excellent choice for beef feedlot producers.
> Additional stay-green nature for a wider harvest window.
AS1047RR EDF
2300-2475 CHU

> Premium choice and long term standard for high volume silage feed.
> Massive dry matter type plant.
> Big, very tall plant with girthy ears that produce flint kernels on white cob.
> Features consistent, heavy top-end tonnage.
> Slow plant and grain drying rate preserves reliable and consistent feed quality at ideal moisture content.
> Extremely well-suited for beef feedlot producers.

A5292G8 RIB
2400-2550 CHU

> NEW dual-purpose silage or grain hybrid choice with the benefit of above and below ground insect trait protection.
> Not a tall plant but gives an ideal balance of forage yield and energy content.
> Very good option for high nutritional value with maximum starch yield.

A5432G2 RIB
2500-2625 CHU

> Proven dual purpose grain and silage hybrid performance.
> Unrivalled starch content and productive starch yield.
> Excellent drought and stress tolerance.
> Early flowering for maturity rating.
> Tall plant with consistent full ear and size.
> Increased energy for more milk/beef produced.
> Good emergence, early vigour, standability and health ensures maximum performance.

NEW VT Double Pro® silage hybrid for 2525-2650 heat unit zones.
> Provides trait protection for above ground insects including European corn borer.
> A taller plant with medium tall ear height.
> Ideal balance of forage yield and energy content.
> Maximum starch yield with rock solid performance.

Dual-purpose silage and grain feed for impressive top-end yield potential for maturity.
> Value-added above and below-ground insect trait protection for added flexibility for corn-on-corn rotations.
> Excellent emergence and aggressive seedling vigour.
> Combines high starch content with digestibility.
> Medium/Tall plant with consistent ear size in a wide range of environments.
> Can benefit from increased plant population.

Conventional choice for dual purpose silage and grain feed.
> Combines an ideal ratio of yield/tonnage, high digestibility with excellent energy content.
> Very strong emergence and aggressive seedling vigour.
> Pushes performance higher with superb energy, dense silage quality, driven by its high deep kernel content.
> Consistent heavy and girthy ear size in a wide range of environments.
**A6260G8 RIB**  
**2625-2725 CHU**

> Dual-purpose silage and grain feed for safe and reliable performance.
> Value-added above and below-ground insect trait protection for added flexibility for corn-on-corn rotations.
> Excellent emergence and aggressive seedling vigour.
> Combines high starch content with digestibility.
> Medium/Tall plant with consistent ear size in a wide range of environments.
> Can benefit from increased plant population.

**A6015**  
**2650-2775 CHU**

> Standard in main crop corn forage.
> Conventional option with dual-purpose characteristics for delivering high silage tonnage.
> Long-lasting stay-green and plant health.
> Combines high starch content with digestibility to deliver superb energy-dense silage and impressive milk/acre levels.

> Standard in main crop corn forage.
> Great dual-purpose characteristics for delivering high silage tonnage.
> Long-lasting stay-green and plant health.
> Combines high starch content with digestibility to deliver superb energy-dense silage and impressive milk/acre levels.

A6018G2 RIB  
2650-2775 CHU

- Great dual-purpose characteristics for delivering high silage tonnage.
- Long-lasting stay-green and health.
- Combines high starch content with digestibility to deliver superb energy-dense silage and impressive milk/acre levels.
- Safe maturity for the majority of mainstream sites in this maturity zone.

A6566G8 RIB  
2700-2850 CHU

- Dual-purpose silage and grain hybrid.
- Combines an ideal ratio of yield/tonnage, digestibility with high starch and energy content.
- Long lasting staygreen and plant health.
- Ideal for continuous corn acres with its value-added above and below-ground insect trait protection.

A6585G8 RIB  
2700-2850 CHU

- Dual-purpose silage and grain hybrid with above and below ground insect trait protection.
- Combines an ideal ratio of yield/tonnage, digestibility with high starch and energy content.
- Very strong emergence and aggressive seedling vigour.
- Long lasting staygreen and plant health.
Highly digestible leafy hybrid with value-added above and below-ground insect protection, especially for corn-on-corn rotations.

- Long, ideal harvest window with slow rate of drydown in plant and ear.
- Keep population at 28,000-30,000 pl/ac for maximum balance of fibre and starch digestibility.
- Excellent choice to form a strong basis of your ration.
- Large ears have kernels with soft texture to increase digestibility.
- Tall plant with excellent standability.
UPCOMING EVENTS

2023

Canadian Beef Industry Conference
Date: August 14-17, 2023
Location: Calgary, Alberta
www.canadianbeefindustryconference.com

Expo-Champs
Date: August 29-31, 2023
Location: Saint-Hyacinthe, Québec
www.expo-champs.com

Canada’s Outdoor Farm Show
Date: September 12-14, 2023
Location: Woodstock, Ontario
www.outdoorfarmshow.com

Ontario Ag Conference
Date: January 3-4, 2024
Location: Ontario and Virtual
www.onntarioagconference.ca

Salon de L’agriculture
Date: January 16-18, 2024
Location: Saint-Hyacinthe, Québec
www.salondelagriculture.com

Manitoba Ag Days
Date: January 16-18, 2024
Location: Brandon, Manitoba
www.agdays.com

Chatham-Kent Farm Show
Date: January 30-31, 2024
Location: Chatham, Ontario
www.chathamkentfarmshow.com

2024

SIMAQ: Salon Industrie et Machinerie Agricole de Québec
Date: January 25-27, 2024
Location: Wilfrid-Hamel, Québec
www.simaq.ca

Ag Expo
Date: February, 2024
Location: Lethbridge, Alberta
www.ag-expo.ca

London Farm Show
Date: March 6-8, 2024
Location: London, Ontario
www.londonfarmshow.com

Ottawa Valley Farm Show
Date: March 12-14, 2024
Location: Ottawa, Ontario

Important: Always read and follow label instructions. Some products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status.

You must sign a Technology Agreement, read the Product Use Guide prior to planting. This seed is acquired under an agreement that includes the following terms: A license must first be obtained from Corteva Agriscience by signing a Technology Use Agreement and abiding by the terms and conditions of the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use Requirements detailed therein which can be found at www.corteva.ca/en/trait-stewardship.html.

Crop and Grain Marketing Stewardship: Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance and Corteva Agriscience's Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact Corteva Agriscience at 1-800-667-3852. Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

These seeds are covered under Corteva Agriscience and M.S. Technologies, L.L.C. Patent Rights which can be found at: www.corteva.ca/en/resources/trait-stewardship.html. The purchase of these seeds conveys no license under said patents to use these seeds.

Patent Information: The transgenic soybean event in the Enlist E3™ soybean is protected under Corteva Agriscience and M.S. Technologies, L.L.C. Patent Rights which can be found at: www.corteva.ca/en/trait-stewardship.html. The purchase of these seeds conveys no license under said patents to use these seeds. For more information, contact your authorized retailer or Corteva Agriscience at 1-800-667-3852 or visit www.corteva.ca/en/trait-stewardship.html.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

PRIDE Seeds offers insecticide & fungicide, fungicide only and untreated seed options subject to availability in all maturity ranges.
